Collectstor

May 2013 – Present

Founder and Full Stack Engineer

Tokyo, Japan and Perth, Australia

Founded Collectstor – a website where collectors can showcase and share their collections.

Coded the website which includes user registration, profile information, news feed and upload using a LAMP stack and jQuery.

Honed entrepreneurial skills by marketing, distributing advertising at events and shops throughout Perth and the US.

Created iOS app in Swift. Implemented a RESTful API to handle app interaction with the website.

Australian Embassy, Tokyo

July 2008 – April 2013

Electronic Media Administrator and Full Stack Engineer

Tokyo, Japan and Perth, Australia

Developed several in-house CMS, an event management and booking CMS, which included an invitation, RSVP, and check in system for the Embassy's biggest yearly event. Projects were done in a LAMP stack and jQuery.

Managed requirements and projects for the Embassy and other Government agencies and stakeholders.

Successfully internationalised, updated and made responsive all Embassy and stakeholders' website, converted all static pages to dynamic using LAMP stack. Other duties included Linux server maintenance and official photographer.

IT Vision

October 2006 – March 2007

Web and Software Engineer

Perth, Australia

Successful integration of a web component using HTML, XSL and C# into their in-house CRM system which uses IBM UniVerse and Java.

Gave a web developer's perspective to the company's CRM, which helped improve the fluency of the project timeline.

HomeTrader

March 2006 – October 2006

Web Developer and Project Manager

Perth, Australia

Managed and coded newsletters, web related content and new projects, as well as an intranet system for web projects in ASP.NET and MS SQL Server.

Itomic

January 2005 – February 2006

Full Stack Web Engineer

Perth, Australia

Worked on the clients' needs analysis, design, implementation and timely deployment of the project individually and in teams. Project manager or team lead on several projects.

Website projects done in PHP, MySQL and JavaScript. Maintained LAMP server.

Coded and implemented the first customisable online shopping cart in PHP.

Omegatrend International

December 2004

HTML and Javascript Programmer (Contract Position)

Perth, Australia

Coded HTML and JavaScript pages for their Global Expansion Program into Hong Kong, the Philippines, the USA, the UK, South Africa and Brunei.

Precise IT Solutions

January 2002 – January 2005

Web Developer, Program Analyst

Perth, Australia

Analyzed, designed, and implemented websites for clients in PHP and ASP, based on extensive research of customer needs and specifications. Also managed end-to-end server setup, deployment and support.

Proposed and led effort creating a successful online shop, transitioning from IT only to a complete e-business solution.

Speedworks Motorsports

January 1999 – January 2002

Database Administrator, Sales Rep and Pit Crew

Perth, Australia

Successfully created, implemented and maintained a stock and products database.
